NOS TYPES DE GRILLES FINITIONS ET GARANTIES

TYPES DE GRILLE

Sablage : Après sa fabrication, la grille est sablée pour la débarrasser de la calamine de découpe et de la fleur de rouille du à la manipulation par les ouvriers ou le stockage en attente du départ en traitement peinture.

Cataphorèse : Avant la finition, la grille est passée dans un bain de cataphorèse, processus anti rouille par immersion qui permet de déposer une fine couche de peinture qui permet une protection anti corrosion de 600 h au brouillard salin. (20 à 30 microns).

Thermolaquage : finition par thermolaquage, dépose de la peinture poudre par projection d'air. Celle-ci vient se coller électro statiquement sur la pièce. Polymérisation à 180 degrés pendant 20 mn. Epaisseur finale 100 à 150 microns peinture plus cataphorèse. Tenue brouillard salin 1000 h.

FINITIONS
